**Assistant Biosafety Officer/ EHS Specialist III (2017-28650), Worcester, MA
UMass Medical School**

This position will report to the Senior Biological Safety Officer within EH&S and act as the Alternate Responsible Official for the Select Agent Program. The individual will assist in overseeing safety and regulatory compliance of the BSL-1 and BSL-2 laboratories as well as the BSL-3, ABSL-3, and Select Agent laboratories.

The successful candidate will oversee the day to day responsibilities associated with the Select Agent Program such as conducting inventory verifications, submitting regulatory amendments for removing, adding and renewing personnel, collaborating with the Police Department to conduct and facilitate the Security Risk Assessment (SRA) access approval process, (FBI background checks), and ensuring compliance with the suitability assessment program. The individual will also assist with completing annual requirements of the program such as inspections, training, reviewing manuals, conducting emergency drills and exercises and other compliance issues. This person will be expected to assist with BSL-1 and BSL-2 laboratory compliance, work closely with

the Institutional Biosafety Committee, assist with review and approval of Laboratory SOPs, and other duties.

The Assistant Biosafety Officer will provide critical safety and compliance assistance to programs such as biosafety lab inspections, training for and shipping of infectious agents, conducting risk assessments, and conducting incident investigations. Other responsibilities may include providing support to various EH&S programs including being available for emergency response (24/7) as necessary.

Discipline in Biosafety/Select Agent:

- Ability to obtain FBI clearance for Select Agent approval.
- Basic knowledge of NIH, BMBL Guidelines, rDNA regulations, CDC, APHIS, and MA DPH regulations, biosafety including Biosafety Level 3 and Animal Biosafety Level 3 regulations and, packing and shipping of infectious materials regulations.
- Basic knowledge of biosafety including performing lab safety inspections.
- Possess aptitude and willingness to don appropriate PPE for entry into BSL 3 containment areas.

Required qualifications: BS degree in Biology, Microbiology, or other Biological Sciences. The candidate could be an experienced Biosafety Professional, Biological/Microbiological Researcher, or other related background with knowledge of high containment laboratory operations and safety.

Desired qualifications: MS degree, RBP, BSL-3/ABSL-3 experience, Select Agent experience (SRA) access approval.

**Laboratory Health and Safety Specialist (EH&S Specialist 1) UCP 5, Storrs, CT
University of Connecticut**

The Division of Environmental Health and Safety at the University of Connecticut, Storrs is seeking an Environmental Health and Safety Specialist (UCP 5). This position reports to the Chemical Health and Safety Manager or designee providing specialty technical services for the University in the area of laboratory safety and is responsible for supporting, developing and implementing the laboratory safety program. This position will serve the University community by conducting laboratory safety inspections, providing training to lab personnel, addressing laboratory safety issues and providing day-to-day guidance on laboratory safety matters.

DUTIES AND RESPONSIBILITIES

- Monitoring University compliance with applicable regulations and University policies in the area of laboratory safety through collection of appropriate data and records, and surveys of laboratories and other University facilities and operations, as needed.
- Providing consultation and training to the University community regarding appropriate procedures, controls, regulations and policies regarding safe laboratory practices, activities, equipment and environmental conditions that might have an impact on environmental health and safety.
- Conducts moderately complex surveys of University facilities and operations for existing hazardous conditions.
- Administers technical training programs regarding laboratory safety for University staff, as required by regulation, University policy or departmental directive.
- Participating in the review of standard operating or experimental procedures and the development of safety guidelines, communications, and educational information pertaining to laboratory safety.
- Compiling data and developing reports on laboratory safety and other environmental health and safety information.
- Investigates and submits written reports on incidents involving environmental health and safety matters.
- Responds to emergencies involving hazardous incidents to aid in remediation efforts on-site, as required.
- Potentially supervising professional and student staff.
- Performing related duties as required

MINIMUM QUALIFICATIONS

1. Bachelor's degree in Environmental Health and Safety, Chemistry, Biology, Engineering or other closely related science field plus one years' experience in the field of health and safety or working in a research, teaching, diagnostic/clinical or quality control laboratory, OR Associate's degree in, Environmental Health and Safety, Chemistry, Biology, Engineering or other closely related science field plus three years' experience as noted above;
2. Knowledge of applicable laws, regulations, nationally recognized standards and guidelines relating to environmental health and safety;
3. Detail-oriented with a strong working ability with computer applications and database software; Knowledge of Microsoft Office products.
4. Excellent written and oral communication skills with the ability to interact effectively with a diverse community of University faculty, staff and students;
5. Ability to respond promptly in-person to all campus locations requiring environmental health and safety services, including the regional campuses, which may be outside of normal business hours.

PREFERRED QUALIFICATIONS

1. Professional certification in safety/health/environmental discipline (e.g., CSP, CHMM, etc.) or meets qualifications for certification.
2. Experience in an academic research environment

- 3.OSHA training (e.g., HAZWOPER) EPA training (e.g., RCRA)
- 4.Experience in presenting training before small and large groups.

APPOINTMENT TERMS

This is a full-time, 12 month permanent position based in Storrs. The University offers a competitive salary, outstanding benefits, including employee and dependent tuition waivers at UConn, and a highly desirable work environment. Salary is dependent upon education, qualifications and experience.

TO APPLY

Applications must be submitted online using UConn Jobs at <http://jobs.uconn.edu>. For full consideration, applications must include a cover letter, resume demonstrating how the qualifications and requirements of the position are met, and contact information for three professional references. An academic recommendation may substitute for one professional reference. Review of applications will begin immediately and continue until the position is filled. Employment of the successful candidate will be contingent upon the successful completion of a pre-employment criminal background check. (Search # 2017661)

This job posting is scheduled to be removed at 11:59 p.m. Eastern time on July 19, 2017.

All employees are subject to adherence to the State Code of Ethics which may be found at <http://www.ct.gov/ethics/site/default.asp>.

**EHS Manager, Dayville CT
PepsiCo**

Job description

This position is responsible for managing plant safety programs to ensure a safe working environment and minimize the risk for accidents.

The safety manager implements safety programs to provide the road map to zero injuries and world class performance, plans and/or delivers programs to train managers and employees in work site safety practices, and promotes plant safety by working with all departments to analyze current situation and recommend safety improvements.

The safety manager also analyzes accident data to identify trends and accident types that can be prevented, works with contractors on equipment installations and modifications and represents the site at external safety events, and audits.

The safety manager must maintain OSHA required records and reports, coordinate compliance driven safety such as annual audiograms, industrial hygiene surveys, respirator fit testing, CPR/First Aid, etc., handles and defends any OSHA complaints, audits etc, and manages Worker's Compensation, communicates AON, and VPP updates.

Implement, execute, and ensure compliance with Frito Lay Company's Health, Safety and Environmental (HSE)policies and procedures

Lead execution of the site's annual HSE Plan, including development of expense and capital budgets needed to support these efforts

Build capability of site resources to support implementation of HSE programming

Manage site-wide system, Program Element (PE) process, to identify and evaluate hazards (risks), and implement effective controls (corrective solutions)

Oversight of the land applications systems

Drive environment programs related to air and waste water scenarios

Lead incident investigation process, including root cause analysis and identification of corrective action plans

Interface with regulatory bodies (OSHA, EPA, State/Local Regulators) Facilitate the completion of a site-wide annual HSE training plan

Participate in formal HSE reviews of existing equipment modifications, new equipment purchases, and changes in site processes

Ensure that required regulatory permits are acquired, that reports are submitted to regulatory agencies, and any site permit conditions (e.g. sampling, recordkeeping) are met

Achieve annual targets for incident frequency, severity and related cost reductions

Qualifications/Requirements:

Influence a philosophy of strategic safety training and ensure the Worker's Compensation Claim Management program is administered in an effective and compliant manner

Provide business consultation to plant leadership team regarding the social system of the plant operations

Cultivate employee commitment to a high performance culture

Actively participate in other Plant Safety Audits and at corporate safety conferences

Education and Certifications:

Degree in Occupational HSE discipline, Science or Engineering preferred

Professional HSE certification or the desire to attain certification (CIH, CSP, CHMM, and / or PE)

Work Experience:

5+ years of Health, Safety and Environmental (HSE, EHS) experience in a manufacturing environment required

Good understanding of the State water regulations

Functional HSE Knowledge in regulatory requirements (ISO 14001/OSHAS 18001), HSE technical aspects (safety, industrial hygiene, environmental), risk management, behavior-based safety, training, auditing / program review, regulatory agency enforcement, HSE vendor / consultant management, business knowledge required

Proven track record in driving cultural change in HSE

Experience in a food manufacturing environment preferred

Experience managing waste water treatment programs

Skills & Capabilities:

Strong communication skills, as well as excellent interpersonal and influence management skills

Incumbent must be able to prioritize and perform multiple tasks without losing momentum while also completing all daily tasks efficiently and effectively

Must be willing and able to travel 5-10% of the time

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, protected veteran status, or disability status.

PepsiCo is an equal opportunity employer Minorities/Females/People with Disabilities/Protected Veterans/Sexual Orientation/Gender Identity.

**Safety Manager, Hartford, CT
LAZ Parking**

The Spirit of the Position:

The Safety Manager supports the regional organization in establishing safe practices and upholding those practices across the nation to lessen the frequency and severity of injuries of all types and property damage claims. The Safety Manager acts as a liaison between regional safety committees, operations management and initiatives originating from our Home Office and helps to support the individual needs of our operations teams throughout the U.S.

Principal Job Duties:

- Develop and promote an accident and injury-free safety culture within all operations.
- Participate in the investigation of vehicle accidents and occupational injuries and make recommendations regarding cause, preventability and retraining.
- Participate (as needed) in the investigation of personal injury and property damage claims to close out existing open claims and also to reduce reserves to lowest possible level.
- Develop safety manuals and standard operating procedures (SOPs).
- Assist in all matters pertaining to safety training.
- Travel as needed to any U.S. locations.
- Maintain company Safety Health and Environmental policies and procedures.
- Track and trend reporting of incidents and calculate injury frequencies for corporate and OSHA compliance.
- Actively participate with local, state, and national agencies and resources to stay abreast of the latest technologies processes and regulations.
- Maintain compliance with all state and federal laws in regions by updating forms and policies and procedures as needed in coordination with the Home Office.
- Coordinate/conduct appropriate health and safety training to all company supervisory and safety personnel. Ensure that all training conducted is effective, timely and well documented.
- Manage DOT compliance by partnering with HR teams around the country.
- Immediately communicates any safety-related incidents to corporate management.

- Coordinate with field staff to ensure that all jobsites are inspected on a regular basis. Follow-through with inspections to make sure they are documented with appropriate corrective actions taken.
- Review reports and dashboards related to safety and claims.
- Leverage analytics, data and reporting to identify better ways to drive results.
- Direct activities of the Regional Safety Champions and their committees to enhance the effectiveness of their efforts.
- Monitor accuracy and effectiveness of the claims database reporting systems to maximize its use in analysis and loss prevention.

Requirements:

Education: Associates or Bachelor's Degree preferred or equivalent work experience.

Experience:

- 3-5 years safety responsibilities including both commercial and hospitality experience with proven results in a multi-site environment.
- 3+ years leading a safety team of decentralized managers.
- General insurance or risk management experience.

Skills:

- Ability to communicate professionally and effectively with all levels of the organization.
- Ability to encourage open expression of ideas and opinions.
- Ability to influence results in a multi-site, multi-state environment.
- Excellent interpersonal skills.
- Ability to document policies, procedures and standard business practices.
- Demonstrates a sense of urgency and timeliness.
- Ability to use Excel (and other tools) to create/develop reports.
- Knowledge of Word, Power Point and General Microsoft Office Applications.

Physical Demands:

- Ability to lift, push and pull at least 10 pounds.

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with qualified disabilities to perform the essential duties/functions.

Environmental Health and Safety Specialist, Shrewsbury, MA
Charles River Laboratories

BASIC SUMMARY: Responsible for managing the Environmental, Health & Safety (EH&S) Program for adherence to local, state, and federal regulations.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

- Establish, administer and update specific EH&S programs for compliance with state and federal Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA), Department of Transportation (DOT) and other regulations as necessary. Manage OSHA and EPA records and maintain reporting and documentation standards.
- Provide initial and periodic safety and environmental training to all employees as required and advise management on safety and environmental issues. Review new regulatory standards and make compliance recommendations.
- Inspect the facility for compliance with OSHA and EPA regulations as applicable. Recommend solutions to management that address deficiencies in EH&S compliance. Submit work orders for facility corrective action on EH&S concerns.
- Assist in the development of EH&S programs and metrics.
- Manage the hazardous waste (RCRA) and medical waste disposal function including waste profiling, permitting, manifesting, and record keeping and reporting.
- Assist management team in emergency response and function as EH&S Emergency Coordinator for 24-hour incident response.
- Serve as Chairperson of the Safety Committee. Assist in the investigation of injuries resulting in lost time claims and/or safety violations and property damage. Make recommendations for corrective action. Provide regulatory guidance on EH&S issues to all staff.
- Available to clients and federal and state investigators to explain procedures and produce written documentation as proof of compliance.
- Request and maintain necessary facility permits, licenses and compliance reports to federal, local and state regulatory authorities.
- Obtain necessary licenses to function as wastewater and underground storage tank operator.
- Coordinate communications to regulatory agencies and client inspections on EH&S related matters.
- May assist in development of departmental budget.
- As required, oversee maintenance of group training manual and training records.
- Support the policy of equal employment opportunity through affirmative action in personnel actions.
- Ensure adherence to pertinent regulatory requirements and to departmental policies, practices and procedures [SOPs, safety procedures and biosafety protocols].

- Perform all other related duties as assigned.

Qualifications

- Education: Bachelor's degree (B.A./B.S.) or equivalent in Environmental Science, Environmental Engineering or related discipline.
- Experience: Five or more years related experience in Environmental Health & Safety.
- An equivalent combination of education and experience may be accepted as a satisfactory substitute for the specific education and experience listed above.
- Certification/Licensure: None.
- Other: Ability to interpret federal and state regulation and apply them to address compliance solutions as required. Effective writing, organizational and time management skills. Computer skills including MS Office and database management.
