**Site Environmental, Health & Safety Manager, Dayville, CT
PepsiCo**

This position is responsible for managing plant safety programs to ensure a safe working environment and minimize the risk for accidents.

The safety manager implements safety programs to provide the road map to zero injuries and world class performance, plans and/or delivers programs to train managers and employees in work site safety practices, and promotes plant safety by working with all departments to analyze current situation and recommend safety improvements.

The safety manager also analyzes accident data to identify trends and accident types that can be prevented, works with contractors on equipment installations and modifications and represents the site at external safety events, and audits.

The safety manager must maintain OSHA required records and reports, coordinate compliance driven safety such as annual audiograms, industrial hygiene surveys, respirator fit testing, CPR/First Aid, etc., handles and defends any OSHA complaints, audits etc, and manages Worker's Compensation, communicates AON, and VPP updates. Implement, execute, and ensure compliance with Frito Lay Company's Health, Safety and Environmental (HSE)policies and procedures

Lead execution of the site's annual HSE Plan, including development of expense and capital budgets needed to support these efforts

Build capability of site resources to support implementation of HSE programming
Manage site-wide system, Program Element (PE) process, to identify and evaluate hazards (risks), and implement effective controls (corrective solutions)

Oversight of the land applications systems

Drive environment programs related to air and waste water scenarios

Lead incident investigation process, including root cause analysis and identification of corrective action plans

Interface with regulatory bodies (OSHA, EPA, State/Local Regulators) Facilitate the completion of a site-wide annual HSE training plan

Participate in formal HSE reviews of existing equipment modifications, new equipment purchases, and changes in site processes

Ensure that required regulatory permits are acquired, that reports are submitted to regulatory agencies, and any site permit conditions (e.g. sampling, recordkeeping) are met

Achieve annual targets for incident frequency, severity and related cost reductions

Qualifications/Requirements:

Influence a philosophy of strategic safety training and ensure the Worker's Compensation Claim Management program is administered in an effective and compliant manner

Provide business consultation to plant leadership team regarding the social system of the plant operations

Cultivate employee commitment to a high performance culture

Actively participate in other Plant Safety Audits and at corporate safety conferences

Education and Certifications:

Degree in Occupational HSE discipline, Science or Engineering preferred

Professional HSE certification or the desire to attain certification (CIH, CSP, CHMM, and / or PE)

Work Experience:

5+ years of Health, Safety and Environmental (HSE, EHS) experience in a manufacturing environment required

Good understanding of the State water regulations

Functional HSE Knowledge in regulatory requirements (ISO 14001/OSHAS 18001), HSE technical aspects (safety, industrial hygiene, environmental), risk management, behavior-based safety, training, auditing / program review, regulatory agency enforcement, HSE vendor / consultant management, business knowledge required

Proven track record in driving cultural change in HSE

Experience in a food manufacturing environment preferred

Experience managing waste water treatment programs

Skills & Capabilities:

Strong communication skills, as well as excellent interpersonal and influence management skills

Incumbent must be able to prioritize and perform multiple tasks without losing momentum while also completing all daily tasks efficiently and effectively

Must be willing and able to travel 5-10% of the time

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, protected veteran status, or disability status.

PepsiCo is an equal opportunity employer Minorities/Females/People with Disabilities/Protected Veterans/Sexual Orientation/Gender Identity.

Connecticut LEP, Hartford, CT
Stantec

Your Opportunity

2,500 Environmental Services staff. 20 technical specialties. 900 professional associations. An international team with local expertise. You could say we know a little something about the environment. Our passion for it drives our work. Grounded by safety, quality, and ethics, we come up with solutions that perfectly fit the site. We know what it takes to balance competing project interests with creativity and efficiency. We know what to look for. And, we know how to get the job done—the right way. Join a team that has the environment down to a science.

Your Duties

Stantec is a large international national publicly traded company. This position has significant career growth potential for the right person. The candidate will work on a variety of site investigation and remediation projects, due diligence assessments and EHS compliance projects in New England and the eastern US.

The position entails project management and technical support on large environmental projects ranging from site investigations to remediation. Some specific responsibilities include conducting field work including soil and groundwater sampling, well installation

oversight and coordination, and stormwater and waste sampling; preparation of Phase I/II/III Environmental Site Assessments, environmental compliance documents, remedial action plans, and various regulatory program permit applications; providing on-site EHS support at client facilities; compiling and interpreting analytical data; and coordinating and communicating effectively with clients, subcontractors, and regulators.

Your Capabilities And Credentials

A Bachelors degree in Geology, Environmental Engineering, or Science is required - Masters degree a plus;

A Connecticut LEP license is a requirement;

Experience with the Massachusetts Contingency Plan and related environmental regulations is a plus;

Strong report writing experience is required;

OSHA 40-Hour HAZWOPER/up-to-date refreshers mandatory and behavior-based health and safety certifications is a plus;

Advanced knowledge of Microsoft Office is a plus;

Good client communications skills is a requirement;

Valid driver's license and a good driving record is required;

Willing and able to travel occasionally is a plus; and

Ability to sell professional services and manage multiple projects and staff is a requirement.
