Environmental, Health & Safety Coordinator, Northampton, MA
L3 Technologies

Job description

The EH&S Coordinator is responsible for the administration, maintenance, and continuous improvement of the L3 KEO Environmental Health and Safety Program. The EH&S Coordinator monitors compliance with operational policies, procedures, corporate guidelines, and all statutory/regulatory requirements. Coordinate with managers and employees to ensure implementation and compliance of safety activities throughout the site. The EH&S Coordinator will ensure the Safety and Environmental Management System is in compliance with industry standards while continuously improving operations and decreasing cycle time/streamlining work processes.

- Monitor and maintain all actions necessary to ensure the facility and all associates are compliant with all local, state and federal agency regulations.
- Monitor, conduct, and/or coordinate EHS related training for associates at frequencies required to maintain compliance.
- Monitor inventory of all required PPE and EHS related equipment and ensure adequate supplies are purchased and available for use.
- Conduct or coordinate and document various types of industrial hygiene sampling and testing to make workplace hazard determinations and develop compliance strategies.
- Support all EHS compliance activities to meet corporate requirements as directed.
- Support all compliance reporting required by local, state, and federal agencies as directed.
- Occasional travel as required to other facilities and field service locations in the United States to assess and monitor compliance with all local, state, and federal agency regulations.
- Interact with all associates evaluating and acting upon any concerns they have as appropriate to maintain EHS compliance.
- Generate, document and maintain all compliance records in both hard copy and electronic formats ensuring they can be easily retrieved for audit and inspection purposes.
- Perform other duties as assigned.

Job Requirements

Must have an Associate Degree in a safety or environmental discipline
3 years of experience in EHS within a manufacturing environment

Skills Required

- Knowledge of OSHA regulations. Ability to achieve regulatory compliance in a manufacturing environment.
- Knowledge of EPA, DOT, MA DEP, and MA DPS regulations.
- Strong computer skills. Skilled in the use of MS Outlook, Word and Excel. Ability to quickly learn and master other software applications a must.
- Shall attend and complete all training programs required by local, state, and federal agencies for operations at L3 KEO facilities.
- Training development and delivery
- Incident Investigation
- Must have the ability to obtain a US Government Security Clearance

Environment/Equipment Used

- Light manufacturing environment. May work in confined, elevated, or hazardous settings for prolonged periods of time.
- Works directly with a variety of workplace hazards including but not limited to: electrical, chemical, noise, respiratory, etc.
- Environment requires extensive safety training for the protection of oneself and the safety of others. The use of appropriate safety equipment (PPE) is required at all times.
- Essential Physical Tasks
- Fine motor dexterity & hand/eye coordination, 20/20 vision with or without the use of glasses or corrective lenses.
- Must be able to lift 20 lbs., sit or stand for up to 9 hours, climb stairs and use ladders.
- Must pass annual physical required by OSHA for use of respirators.

Equal Opportunity Employer - minorities / females / veterans / individuals with disabilities / sexual orientation / gender identify.

**Environmental Project Manager, Northampton, MA
Stantec**

Your Opportunity: Stantec is one of the largest employers of full-time, experienced environmental professionals in the eastern United States. Our current staff includes specialists in wetland science, wildlife biology, soil science, fisheries biology, botany, hydrology, forestry, habitat restoration, marine biology, environmental permitting, and GIS. Our Environmental Services group is dedicated to managing environmental issues proactively and professionally. We focus on hiring talented, enthusiastic, and hard-

working individuals that have a keen interest in the natural sciences and a commitment to working in a team-based environment.

Your Duties: Stantec's Environmental Services practice seeks an Environmental Project Manager to provide project management, lead environmental regulatory and project permitting efforts, supervise and mentor staff, and support business development opportunities. Project management responsibilities include developing proposals; managing projects and budgets; coordinating with clients, stakeholders, and internal project staff; and performing and overseeing project technical work. Environmental regulatory and permitting responsibilities include identifying project-specific environmental regulatory requirements, coordinating with resource agency personnel, writing and reviewing technical reports, developing environmental permit applications, presenting at public meetings, and facilitating successful environmental permitting of multiple and varied projects. Business development responsibilities include maintaining existing client relations and collaborating to develop and pursue new clients and opportunities. Additional responsibilities may include coordinating, conducting, and/or leading field work.

Your Capabilities and Credentials

Required Skills And Experience Include

- Bachelor's degree in the natural sciences, natural resource management, or related field;
- Minimum 2 years environmental consulting experience;
- Minimum 3 years project management experience;
- Minimum 5 years of progressively responsible experience related to natural resource management, environmental planning, and/or related field(s);
- Technical specialization and expertise in the field(s) of wetland science, botany, wildlife biology, soil science, or related field(s);
- Demonstrated experience with local, state, and federal environmental regulations and permitting in Massachusetts and/or Connecticut, including experience with the Massachusetts DEP wetlands and waterways permits and/or Connecticut DEEP permits, Sections 401 and 404 of the Clean Water Act, MEPA and/or CEPA, NPDES, and state- and federally listed species regulations and permitting;
- Strong ability to interpret and use site plans, topographic maps, aerial photographs, and other maps and mapping resources;
- Strong written and verbal communications skills;
- Willingness and ability to travel;
- Ability to perform fieldwork; and
- A strong work ethic, sense of humor, high ethical standards, a desire for team success and ability to thrive in a fast-paced environment.

Desired Skills Include

- Minimum 5 years of environmental consulting and project management experience;
- Minimum 10 years of progressively responsible experience related to natural resource management, environmental planning, and/or related field(s).
- Experience in specialty areas including electric and gas transmission and distribution, renewable energy, and utilities;
- Demonstrated business development experience and strong existing client relationships;
- Demonstrated positive reputation and relationships with environmental regulators;
- Experience conducting wetland delineations; and
- Experience conducting construction observation.

**Site Environmental, Health & Safety Manager, Dayville, CT
PepsiCo**

Job Description:

This position is responsible for managing plant safety programs to ensure a safe working environment and minimize the risk for accidents.

- The safety manager implements safety programs to provide the road map to zero injuries and world class performance, plans and/or delivers programs to train managers and employees in work site safety practices, and promotes plant safety by working with all departments to analyze current situation and recommend safety improvements.
- The safety manager also analyzes accident data to identify trends and accident types that can be prevented, works with contractors on equipment installations and modifications and represents the site at external safety events, and audits.
- The safety manager must maintain OSHA required records and reports, coordinate compliance driven safety such as annual audiograms, industrial hygiene surveys, respirator fit testing, CPR/First Aid, etc., handles and defends any OSHA complaints, audits etc, and manages Worker's Compensation, communicates AON, and VPP updates.
- Implement, execute, and ensure compliance with Frito Lay Company's Health, Safety and Environmental (HSE)policies and procedures
- Lead execution of the site's annual HSE Plan, including development of expense and capital budgets needed to support these efforts
- Build capability of site resources to support implementation of HSE programming
- Manage site-wide system, Program Element (PE) process, to identify and evaluate hazards (risks), and implement effective controls (corrective solutions)
- Oversight of the land applications systems
- Drive environment programs related to air and waste water scenarios
- Lead incident investigation process, including root cause analysis and identification of corrective action plans
- Interface with regulatory bodies (OSHA, EPA, State/Local Regulators) Facilitate the completion of a site-wide annual HSE training plan
- Participate in formal HSE reviews of existing equipment modifications, new equipment purchases, and changes in site processes

- Ensure that required regulatory permits are acquired, that reports are submitted to regulatory agencies, and any site permit conditions (e.g. sampling, recordkeeping) are met
- Achieve annual targets for incident frequency, severity and related cost reductions

Qualifications/Requirements:

- Influence a philosophy of strategic safety training and ensure the Worker's Compensation Claim Management program is administered in an effective and compliant manner
- Provide business consultation to plant leadership team regarding the social system of the plant operations
- Cultivate employee commitment to a high performance culture
- Actively participate in other Plant Safety Audits and at corporate safety conferences
- Education and Certifications:
 - Degree in Occupational HSE discipline, Science or Engineering preferred
 - Professional HSE certification or the desire to attain certification (CIH, CSP, CHMM, and / or PE)

Work Experience:

- 5+ years of Health, Safety and Environmental (HSE, EHS) experience in a manufacturing environment required
- Good understanding of the State water regulations
- Functional HSE Knowledge in regulatory requirements (ISO 14001/OSHAS 18001), HSE technical aspects (safety, industrial hygiene, environmental), risk management, behavior-based safety, training, auditing / program review, regulatory agency enforcement, HSE vendor / consultant management, business knowledge required
- Proven track record in driving cultural change in HSE
- Experience in a food manufacturing environment preferred
- Experience managing waste water treatment programs

Skills & Capabilities:

- Strong communication skills, as well as excellent interpersonal and influence management skills
- Incumbent must be able to prioritize and perform multiple tasks without losing momentum while also completing all daily tasks efficiently and effectively
- Must be willing and able to travel 5-10% of the time

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, protected veteran status, or disability status.

PepsiCo is an equal opportunity employer Minorities/Females/People with Disabilities/Protected Veterans/Sexual Orientation/Gender Identity.

**Senior Environmental Scientist, Wallingford, CT
Burns & McDonnell**

Job description

We are seeking a self-motivated Environmental Health & Safety (EHS) Compliance Specialist to be part of an established group of EHS compliance professionals while managing projects, providing technical expertise and establishing and maintaining client relationships in the area of multi-media EHS compliance.

The position requires strong regulatory and technical understanding of facility and corporate-level environmental permitting/compliance support, including EHS multi-media compliance auditing, permit preparation, hazardous waste management (RCRA), and facility-level training. Must have experience understanding, developing, and implementing environmental management systems, and assisting clients with obtaining third-party certifications and verifications. Other key areas of compliance support include developing and preparing SPCC plans, Storm Water Pollution Prevention Plans (SWPPPs), ICPs, federal and state EPCRA reporting, and PCB contaminated material management.

The position also requires a track record of identifying new clients, managing client relationships, and developing specific work programs for these clients, including taking a lead role in project management of the work and supporting the development of environmental compliance strategies.

Experience with ISO 14001 certifications and OSHA regulations is a plus, but not required.

Qualifications

- Bachelor's degree in engineering, environmental science or related degree from accredited program. Minimum 7 years related consulting experience in a wide variety of areas ranging from program management, professional environmental services, and business development. Completion of master's degree in related field may be substituted for one year of experience.

Other Qualifications

- Excellent written and verbal communication skills.
- Ability and desire to conduct technical research, expand technical knowledge basis, and remain current on new regulations and market trends

- Strong leadership, interpersonal, and communication skills
- Strong marketing/business development skills
- Ability to work within a Team framework
- Significant report writing experience
- Travel – 50-100%
- Bachelor's degree in environmental science/biology or related science field. Minimum 7 years applicable experience. Strong analytical and problem solving skills. Proficient computer skills. Superior technical writing abilities. Excellent written & verbal communication skills. Project management skills. Technical specialty.
