**Environmental, Health & Safety (EHS) Leader, East Longmeadow, MA
Stanley Black & Decker, Inc.**

Job description

Since 1915, LENOX has done more than innovate at cutting; we've lead the industry, commanded the science, developed sharper ideas, listened to your needs and delivered the world's most advanced cutting solutions. In 2017, LENOX joined the Stanley Black & Decker family of brands which has been recognized as the largest, fastest growing, and most innovative Tools and Storage Company in the world. At Stanley Black & Decker, our people are our single greatest asset. They are the industry's best, and they are empowered to create opportunities for success. Every day, they define excellence with everything they do. Are you ready to join our winning team?

General Responsibilities

This position's primary focus is to drive a safety and injury preventative culture through managing the development, implementation, and sustainability of comprehensive environmental, health and safety programs for the East Longmeadow plant. Provides leadership, direction and support to ensure compliance with all applicable federal, state, and local laws. Requires the ability to develop collaborative relationships with all levels within and outside the organization.

Duties

Supports creation of EHS goals for the facility and appropriate activity-based goals for the leadership team, functional managers, and front-line supervisors to drive EHS culture, compliance, and results.

Lead the Safety Leadership Team and partner with Operations & Human Resources on driving employee engagement throughout the facility

Analyze and report out site performance at weekly attainment meeting to Operations leadership

Drive incident and near miss reporting. Perform root cause analysis on incidents and injuries to determine specific actions to prevent their reoccurrence.

Responsible for the First Responder Program

Partner with Operations managers and supervisors on safety content for monthly department meetings

Strong shop floor presence to drive and promote safety culture

Create and facilitate internal trainings for staff including: New hire and one month orientations, general safety awareness training, machine guarding, hand and powered tool safety, ladder safety, LOTO, forklift, etc.

Responsible for HELP Card Audit Program (BBS Program)

Translate corporate EHS requirements of external/internal auditing programs, environmental reporting requirements, safety initiatives, EHS Road Map, scorecards, and training programs into management systems with site-specific goals.

Partner with corporate EHS leads to implement corporate EHS audit program requirements, ensure audit findings and recommendations are resolved, closed and documented according to corporate requirements.

Function as a liaison for the facility with governmental inspectors, agencies, and regulators.

Oversee Wellness initiatives and provide support where necessary.

Oversee and assist EHS team during facility restructuring projects/major process changes to verify that environmental permits are obtained at the facility prior to the installation or modification of equipment/process change.

Assures compliance to all OSHA regulatory standards which include but are not limited to industrial hygiene, energy control (LOTO), NFPA 70e, confined space entry, fall protection, machine guarding, powered industrial trucks, hot work and contractor safety.

Manage the safety data sheet and new chemical request process

Minimum Education, Skills And Experience Requirements

Bachelor's degree or equivalent in health and safety or environmental sciences

Minimum of 5 years' experience in a manufacturing or regulatory government environment preferred

Dynamic communication skills – verbal and written

Demonstrated ability to enthusiastically lead a team of direct reports and supporting EH&S committees and teams

Strong knowledge of OSHA, EPA and other applicable industry environmental, health and safety standards

Strong analytical skills to create and analyze performance metrics and outcomes

Superior problem solving and decision making skills with the ability to develop and implement multiple solutions

Experience with Word, Excel, PowerPoint and invoicing systems

Ability to adjust work hours as needed

Certified Safety Professional (or equivalent) preferred

Previous ISO14001/18001 experience preferred but not required

**Environmental Project Manager, Northampton, MA
Stantec**

Job description

Stantec is one of the largest employers of full-time, experienced environmental professionals in the eastern United States. Our current staff includes specialists in wetland science, wildlife biology, soil science, fisheries biology, botany, hydrology, forestry, habitat restoration, marine biology, environmental permitting, and GIS. Our Environmental Services group is dedicated to managing environmental issues proactively and professionally. We focus on hiring talented, enthusiastic, and hard-working individuals that have a keen interest in the natural sciences and a commitment to working in a team-based environment.

Stantec's Environmental Services practice seeks an Environmental Project Manager to provide project management, lead environmental regulatory and project permitting efforts, supervise and mentor staff, and support business development opportunities. Project management responsibilities include developing proposals; managing projects and budgets; coordinating with clients, stakeholders, and internal project staff; and performing and overseeing project technical work. Environmental regulatory and permitting responsibilities include identifying project-specific environmental regulatory requirements, coordinating with resource agency personnel, writing and reviewing technical reports, developing environmental permit applications, presenting at public meetings, and facilitating successful environmental permitting of multiple and varied projects. Business development responsibilities include maintaining existing client relations and collaborating to develop and pursue new clients and opportunities. Additional responsibilities may include coordinating, conducting, and/or leading field work.

Required Skills And Experience Include

Bachelor's degree in the natural sciences, natural resource management, or related field;

Minimum 2 years environmental consulting experience;

Minimum 3 years project management experience;

Minimum 5 years of progressively responsible experience related to natural resource management, environmental planning, and/or related field(s);

Technical specialization and expertise in the field(s) of wetland science, botany, wildlife biology, soil science, or related field(s);

Demonstrated experience with local, state, and federal environmental regulations and permitting in Massachusetts and/or Connecticut, including experience with the Massachusetts DEP wetlands and waterways permits and/or Connecticut DEEP permits, Sections 401 and 404 of the Clean Water Act, MEPA and/or CEPA, NPDES, and state- and federally listed species regulations and permitting;

Strong ability to interpret and use site plans, topographic maps, aerial photographs, and other maps and mapping resources;

Strong written and verbal communications skills;

Willingness and ability to travel;

Ability to perform fieldwork; and

A strong work ethic, sense of humor, high ethical standards, a desire for team success and ability to thrive in a fast-paced environment.

Desired Skills Include

Minimum 5 years of environmental consulting and project management experience;
Minimum 10 years of progressively responsible experience related to natural resource management, environmental planning, and/or related field(s).
Experience in specialty areas including electric and gas transmission and distribution, renewable energy, and utilities;
Demonstrated business development experience and strong existing client relationships;
Demonstrated positive reputation and relationships with environmental regulators;
Experience conducting wetland delineations; and
Experience conducting construction observation.

Safety Technician, Shrewsbury, MA
Metso

Job description

How about working with challenging tasks in a respectful and friendly working environment, developing world leading solutions, and being part of a global yet tight-knit network of 11,000 colleagues in 50 countries?

This is Metso.

Job posting end date: 05/28/2018

Primary Objectives

Assist the HSE Manager in the implementation and execution of safety and health programs to raise employee awareness of risks; to reduce, avoid, and protect employees from hazards; and to enhance health. Coordinate efforts to ensure safety and environmental compliance with company policies and procedures, as well as state and federal laws and regulations.

Principal Duties

Ensure that Environmental Health & Safety program practices are understood and followed by employees

Assist in maintaining the Health Safety Environment management systems such as ISO 14001, 45001

Perform operational work duty observations, document findings and enforce safe work practices

Assist with Powered Industrial Truck hands-on training and certification process

Conduct periodic facility safety inspections for occupational and environmental hazards

Develop Job Safety Analysis for high risk operational tasks, and communicate the best known method to effected employees

Complete hazard assessments for work processes

Help coordinate Emergency Response drills, and act as an Assistant Incident Commander for emergency evacuation events

Qualify as a First Aid Responder, and help coordinate first responder training drills

Audit the Hot Work permit process, and ensure that all documentation is kept on file

Assist with accident/incident investigation and root cause analysis

Manage the Near Miss/Risk Observation Program, to include gathering near miss data, determining root cause, and communicating the incident to effected employees

Assist in conducting New Hire and Contractor Safety Orientations

Work with licensed overhead crane operators in conducting periodic inspections

Present safety training on topics relative to both operational and office employees

Facilitate the site Safety Committee, and generate minutes for the topics discussed

Maintain first aid supplies and stock of PPE for the site

Help Coordinate annual employee Hearing tests

Act as the first point of contact for employee safety concerns

Follow-up on safety action items, to ensure they are completed and closed to satisfaction

Assist our environmental consultants with acquiring information relative to ongoing permits or special projects

Perform administrative tasks or other safety job duties in support of the EH&S Manager

Education, Experience, And Skills Required

Bachelor's degree in related field or equivalent experience

Certification in CPR/AED, First Aid and Bloodborne Pathogens.

Understanding and experience working with ISO 14001 and 45001 systems

Minimum of 3 years of Occupational Health & Safety experience (preferably in a manufacturing environment) including knowledge of Safety, Worker's Compensation, OSHA and DOT.

Excellent oral and written communication skills, as well as skills in decision-making, problem solving and time management. Ability to create and provide effective training as well as communicate with all levels of the organization

Organizational skills and attention to detail are essential

Proficiency in word processing and spreadsheet applications, preferably MSWord and Excel

Ability to conduct shop and office tours relative to safety inspections and light duty job assignments.

WE OFFER

Friendly, respectful environment

Challenging opportunities that contribute to the development and enhancement of Metso's industry leading solutions

Opportunity to work in a global community

Pride in working for an industry leader in mining, aggregates, recycling and oil and gas (one of the top employers in Finland!)

Competitive healthcare options, 401K matching, flexible work schedules, tuition reimbursement, and much more!
