Environmental Engineer, Hartford, CT

GHD is one of the world's leading professional services companies operating in the global markets of water, energy and resources, environment, property and buildings, and transportation. Privately owned by our people, GHD provides engineering, architecture, environmental and construction services to private and public sector clients across five continents. Focused on creating lasting community benefit, our connected global network of 8500 people delivers projects with high standards of safety, quality and ethics. Committed to sustainable development, GHD improves the physical, natural and social environments of the many communities in which we operate.

Our office in Hartford, Connecticut is looking for a junior-level Environmental Engineer to join their Environmental Services group. This is an excellent opportunity for you to begin to develop your professional skills by learning from the members of our Contamination Assessment & Remediation service line.

This role will allow you the opportunity to work on the following:

- Office work could include: compilation, review & interpretation of sampling data, preparation of sections of reports & proposal, subcontractor coordination, summarizing data in tables and figures, regulatory understanding and application, compliance audits, etc.
- Field work could include: sampling of soil, groundwater, surface water, stormwater, sediment, soil gas & indoor air, aquifer testing, closure of underground storage tanks, oversight of remedial actions, and oversight of geophysical testing.

The successful candidate will possess the following skills and qualifications:

- Bachelor's and/or Master's degree in Environmental Engineering
- EIT preferred with intent to pursue Professional Engineering license
- Up to 3 years of experience in contaminated site assessment and remediation projects
- Ability to travel and perform field work up to 20% of the time
- Knowledge and understanding of AutoCAD is an asset
- Experience with modelling and statistical software a plus
- Ability to travel and perform field work on an as needed basis
- OSHA 40-hour HAZWOPER is also a plus

GHD is a large, well established organization with a culture that promotes teamwork, integrity and respect. As a valued member of the business, you will have the

opportunity to work with industry leaders and to develop your career through the GHD Business School. As a multicultural organization, we encourage individual achievement and recognize the strength of a diverse workforce. GHD is an equal opportunity employer. We provide equal employment opportunities to all qualified employees and applicants without regard to race, creed, religion, national origin, citizenship, color, sex, sexual orientation, gender identity, age, disability, marital status or veteran status.

If you are interested in pursuing this position, please submit your resume and cover letter via GHD's careers website:

**Sr. Environmental Engineer, East Hartford, CT
 Parsons Corporation**

Job description

Parsons is an industry leader in delivering technology driven solutions to promote safer, healthier and sustainable world class infrastructure to communities throughout the world. Our landmark projects and capital improvement programs support global initiatives in infrastructure, water, energy, power, renewables, environmental, healthcare, education, and communications. This position specifically will support our environmental remediation team which supports complicated soil, sediment and groundwater remediation’s from initial investigations through construction and site closeouts. We are hiring colleagues with an entrepreneurial spirit who thrive on professional challenges in a high energy environment.

We are looking for a self-motivated, mid to senior-level environmental remediation professional Engineer to lead environmental projects and interface with clients. If you are the right one for us, you have site investigation experience, are committed to quality, and have a passion to protect the environment!

In this role, you will be performing investigation and remediation of former manufactured gas plant (MGP) sites and/or coal combustion residuals (CCR) sites. You will be involved in the investigative analysis of multiple sites, to determine contamination and design the remediation solution for the site. You will need to be a Licensed Environmental Professional (LEP) in the State of Connecticut, to work on this project. This position would be based out of the East Hartford, CT office, however willingness to travel to supplier, client, or construction site locations, is expected.

We expect you to be proficient at managing project tasks independently (e.g., field programs) and have expertise in developing written reports based on site investigation findings and design/prepare documents for the remediation solutions, based on those findings. You will interface directly with the client and other Parsons subject matter experts on a regular basis. If you are interested in a Project Management position in the future, this is a great step in that direction!

Job Requirements:

- 4-year degree in an engineering or field related curriculum.
- 8+ years relevant industry experience investigating and remediating environmental sites; experience with MGP and/or CCR sites is preferred.
- Professional Engineer (PE) certificate preferable
- License Environmental Professional (LEP) in the State of Connecticut is required!
- Proficiency in various computer software applications typically used within the assigned discipline.
- Proficient technical writing ability
- Proficient verbal presentation skills
- Understanding of environmental rules and regulations.
- Preferable 40-hour OSHA HAZWOPER Certification and valid refresher course.
