Environmental Engineer, Hartford, CT

GHD is one of the world's leading professional services companies operating in the global markets of water, energy and resources, environment, property and buildings, and transportation. Privately owned by our people, GHD provides engineering, architecture, environmental and construction services to private and public sector clients across five continents. Focused on creating lasting community benefit, our connected global network of 8500 people delivers projects with high standards of safety, quality and ethics. Committed to sustainable development, GHD improves the physical, natural and social environments of the many communities in which we operate.

Our office in Hartford, Connecticut is looking for a junior-level Environmental Engineer to join their Environmental Services group. This is an excellent opportunity for you to begin to develop your professional skills by learning from the members of our Contamination Assessment & Remediation service line.

This role will allow you the opportunity to work on the following:

- Office work could include: compilation, review & interpretation of sampling data, preparation of sections of reports & proposal, subcontractor coordination, summarizing data in tables and figures, regulatory understanding and application, compliance audits, etc.
- Field work could include: sampling of soil, groundwater, surface water, stormwater, sediment, soil gas & indoor air, aquifer testing, closure of underground storage tanks, oversight of remedial actions, and oversight of geophysical testing.

The successful candidate will possess the following skills and qualifications:

- Bachelor's and/or Master's degree in Environmental Engineering
- EIT preferred with intent to pursue Professional Engineering license
- Up to 3 years of experience in contaminated site assessment and remediation projects
- Ability to travel and perform field work up to 20% of the time
- Knowledge and understanding of AutoCAD is an asset
- Experience with modelling and statistical software a plus
- Ability to travel and perform field work on an as needed basis
- OSHA 40-hour HAZWOPER is also a plus

GHD is a large, well established organization with a culture that promotes teamwork, integrity and respect. As a valued member of the business, you will have the

opportunity to work with industry leaders and to develop your career through the GHD Business School. As a multicultural organization, we encourage individual achievement and recognize the strength of a diverse workforce. GHD is an equal opportunity employer. We provide equal employment opportunities to all qualified employees and applicants without regard to race, creed, religion, national origin, citizenship, color, sex, sexual orientation, gender identity, age, disability, marital status or veteran status.

If you are interested in pursuing this position, please submit your resume and cover letter via GHD's careers website:

**Environmental Health & Safety Manager, Agawam, MA
SUEZ in North America**

Job Description

About SUEZ

We are at the dawn of the resource revolution. In a world facing high demographic growth, runaway urbanization and the shortage of natural resources, securing, optimizing and renewing resources is essential to our future. SUEZ (Paris: SEV, Brussels: SEVB) supplies drinking water to 92 million people, delivers wastewater treatment services to 65 million, recovers 16 million tons of waste each year and produces 7 terawatt hours of local and renewable energy. With 82,500 employees, SUEZ, which is present on all five continents, is a key player in the sustainable management of resources. SUEZ generated total revenues of \$16.5 billion in 2016.

The position will be responsible for developing, implementing and managing environment, health and safety, and industrial risk programs in the New England Region - West which will allow management to monitor, verify, and strengthen compliance with safety and environmental regulations. Under limited direction, evaluate, plan, organize, coordinate and implement the environmental compliance, health and safety programs for the assigned Region; take action to ensure compliance with federal and state safety, health and environmental regulations and requirements; advise managers on safe work methods and practices and the elimination of hazardous conditions and environmental hazards; investigates accidents, near misses, and chemical release and environmental compliance incidents, and manage the necessary reporting to ensure proper reporting both internally and to external regulatory agencies. Interface with corporate EHS team to implement corporate initiatives at the region and project level.

Serve as the Regional contact for the Environmental Compliance Assurance Program (ECAP), Health and Safety Program, Emergency Response Plan and other activities. The role will require field presence including the oversight, operational support and coordination of all EHS programs, working with corporate team to improve the effectiveness of our EHS activities and provide training to develop and strengthen all staffs knowledge and field execution of safe work and environmental practices. It will also carry responsibility to conduct investigations and develop / implement remedial programs, where necessary.

Required Skills

- Strong organizational, oral, written and interpersonal skills;
- Strong writing, coaching, and teaching skills;
- Ability to balance changing and potentially conflicting priorities.
- Ability to self-organize & prioritize and drive own work schedule.
- Ability to interact with all levels within the Region and Division;
- Proficient knowledge of MicroSoft Office including Excel, Word, Outlook and PowerPoint;
- Maintain specialized knowledge of safety and environmental regulations and industry consensus safety and environmental guidelines; and
- Willingness and ability to work in the field and with field staff evaluating, coaching and supporting safety and environmental compliance extensively (70%).
- Willingness and ability to travel extensively (50-75%);
- Willingness to be on call (24/7) to respond to & assist with injury and/or environmental emergencies;
- Willingness to work extended work schedules (as needed) to accomplish Region's needs and objectives.

Required Experience

- Bachelor of Science Degree in Safety, environmental engineering, or equivalent
- Certified Safety Engineer (CSP), Certified Industrial Hygienist (CIH) or the ability and willingness to obtain these certification desired
- 5-7 years of related experience in EH&S compliance.
- Work experience in water and wastewater industry, laboratory or other utility industry

 Clean Harbors**

Position Description: The Environmental Services Project Manager (known internally as a Field Service Specialist) is responsible for supporting and enhancing customer service and satisfaction in conjunction with the Account Manager. This individual scopes projects, provides client support, and prepares proposals/cost estimates. Environmental Projects include tank cleaning, remediation, demolition, vacuum services, decontamination, marine operations and emergency response services.

Responsibilities

Ensure Health and Safety is the number one goal by following policies, processes, and acting in a safe manner at all times.

Conduct walk-throughs and scope potential projects for clients including cost estimation, technical proposal preparation and client support.

Provide technical support for proposal preparation, project cost estimates and subcontractor selection and procurement.

Set-up projects; coordinate resources and scheduling; ensure proper costing/utilization of labor and equipment.

Act as an agent of business and is involved with developing relationships with key customers and understanding the customer issues.

Interface with the customer in a professional and effective manner to update them on the project status and/or to resolve problems/issues.

Manage large-scale field service and emergency response projects, when directed.

Direct personnel in the operational procedures to complete assignments and understands the labor and equipment requirements to complete field service projects and emergency responses.

Understand and work with the Field Service Coordinator in the communication of the labor, equipment and resources required to complete field service and emergency response projects.

Participate in joint sales calls with the Account Manager.

Oversees and is responsible for projects for health & safety, profitability, completeness and professionalism.

Ensure proper communication to the foreman/supervisor to ensure that contractual obligations are met to complete requested services, project progression status and change orders are completed and executed, prior to any additional work being performed. Ensures the customer acknowledges change order(s).

Review operational procedures to assure correct health & safety action plans and communicate effectively with the health & safety organization regarding on-site specific action.

Document competitive issues and convey findings to management.

Trains and mentors Field Service Foreman and assists the Field Service General Manager in the completion of performance reviews for individuals who they have direct or indirect supervision.

Perform other duties and tasks as assigned from time to time by management as required by the needs of the business.

Requirements

High School diploma or equivalent required (Bachelor's Degree preferred)

5+ years of experience in Environmental Services (i.e. remediation, abatement, emergency spill response, etc.)

Knowledge of scoping/pricing of Environmental Services work

Ability to work in a high demand deadline oriented environment

Leadership and supervisory skills

Knowledge of equipment, environmental regulations/statutes, safety and compliance strongly preferred

Excellent verbal and written communication skills

Excellent interpersonal and presentation skills

Proficiency in Windows based applications

Physical Requirements

Requires near visual acuity, speaking and listening.

Requires sitting, standing, walking, grasping and reaching.

Requires lifting up to 10lbs, pulling and/or pushing and carrying.

**EHS Manager, Rumford, RI
Eaton**

Job description

Eaton's Fluid Electrical Distribution Division is seeking an EHS Manager. The EHS Manager will be based at our Rumford, RI facility.

Position Overview:

The EHS Manager provides environmental, health, safety, and security leadership to the site. This individual is accountable for: directing EHS activities at his/her location(s); establishing EHS objectives and targets; internal reporting of EHS Performance; communication of national, area, and local regulatory requirements, and; ensuring documents are available in the local languages. Position is responsible for: maintaining site ISO/OHSA certifications; assuring accurate and complete EHS reporting of metrics; assuring closures of MESH and regulatory agency findings on a timely basis; completion of required training for EHS personnel; managing interfaces with the public and governmental authorities with adverse findings and enforcement actions; directing actions during crises; site security, creating a strong EHS culture that engages employees throughout the site in EHS teams and processes.

Essential Responsibilities:

Manages and directs site in achieving EHS targets and objectives. Directs development, maintenance, and achievement of goals in support of corporate and business group EHS strategic initiatives.

Facilitates risk assessment at the location to critical EHS hazards and aspects. Works with leadership team to create targets and objectives based on key EHS risks.

Determines appropriate leading and lagging indicators to track performance against targets and objectives.

Supports creation of EHS goals for the site manager and appropriate activity based goals for the leadership team, functional managers, and front-line supervisors to drive EHS culture, compliance, and results.

Works to assign MESH element champions and facilitate their engagement in ownership of the MESH elements.

Drives and promotes zero incident EHS culture throughout site.

Creates and facilitates EHS engagement through EHS teams and committees needed to accomplish the established targets and objectives for the year.

Works with leadership team and MESH element champions to complete an annual evaluation of compliance for EHS country, state, and local regulations.
Pursues third party recognition for programs that establish the site and Eaton's EHS program as world class.
Uses established EHS data processes such as MESH Suite to manage data such as injuries and illnesses, environmental metrics, risk assessments, EHS action items and other pertinent information.
Create training matrices to ensure that all training is defined and tracked to completion.
Work with site leadership team and facilities to ensure that all key EHS operational controls are in place, on a PM program, and that EHS action items are resolved on a timely basis.

Desired Skills and Experience

Basic Qualifications:

Bachelor's degree from an accredited institution required.
Minimum 4 years of experience in environmental, health, and safety (or a combination of these functions).
Must be legally authorized to work in the United States without company sponsorship.
This position requires use of information or access to hardware which is subject to the International Traffic in Arms Regulations (ITAR). All applicants must be U.S. persons within the meaning of ITAR. ITAR defines a U.S. person as a U.S. Citizen, U.S. Permanent Resident (i.e. 'Green Card Holder'), Political Asylee, or Refugee.

Preferred Qualifications:

Bachelor's Degree in Occupational Safety, Industrial Hygiene, or Environmental Science from an accredited institution.
Master's degree from an accredited institution.
Program management experience.
Experience working in a manufacturing environment.
Professional certification (Certified Safety Professional, Certified Industrial Hygienist, or Certified Hazardous Materials Manager).
Previous experience in a leadership role.
