EH&S SPECIALIST, Agawam, MA
OMG Inc.

OMG Inc. is a leading manufacturer of fastening products and technologies for the commercial roofing and other construction industries worldwide. Based in Massachusetts, with manufacturing facilities in Agawam, MA, Addison, IL, Asheville, NC, and Rockford, MN, OMG is an equal opportunity employer valuing integrity, teamwork, diversity, trust, respect, communication, accountability, proactive performance and a passion for excellence!

Opportunity

Safety is OMG's number one priority and we have a proactive and progressive Environmental Health & Safety program. The EH&S Specialist develops, implements, and maintains successful environmental & safety initiatives at our facilities. Reporting to the EH&S Manager, the position demands creative problem solving, strong communication skills and the ability to collaborate effectively within the organization. We value an understanding of production manufacturing processes, and a commitment to working as a team player! Our goal is that this change agent will lead by example and foster safety as the highest priority in our culture and value system!

Responsibilities

- * Provide support and guidance daily on safe work practices and proper PPE
- * Ensure EH&S compliance audits are completed properly and timely
- * Assist with safety committee initiatives and goals, driving participation and follow up.
- * Perform incident/accident investigations, root cause analysis, determination of corrective actions, and ensure recommended corrective actions/preventative measures are completed in a timely manner
- * Perform Industrial Hygiene monitoring for heat stress, air quality, confined space atmospheric testing, and perform ergonomic evaluations and recommendations.
- * Drive continuous improvement and ergonomics initiatives
- * Prepare and maintain accurate site EH&S records and documentation, including tracking and reporting of safety statistics
- * Perform safety and environmental training in accordance with established safety programs and policies
- * Assist with injury case management and worker's compensation claims.
- * Conduct visible opacity evaluation via EPA method 9 and 24
- * Provide assistance and support to maintain OSHA and EPA compliance with hazard communications (HazCom), medical surveillance, emergency response, wastewater and VOC emissions
- * Assist with implementation of specialized programs to ensure facility compliance with

hazardous waste management, storm water management, blood-borne pathogens, audiometric testing program, fall protection, confined space and ergonomics

- * Manage respiratory protection program
- * Perform other tasks as assigned

Requirements

- * Bachelor in Environmental Science, Industrial Safety, Engineering or a closely related technical field
- * Minimum 5 - 10 years' experience in an EH&S role (Manufacturing preferred)
- * Knowledge of OSHA, EPA, MassDEP, RCRA, Life Safety, EH&S and Industrial Hygiene assessment methods
- * HAZWOPER certification preferred
- * In depth knowledge of machine safe guarding, electrical safety, chemical safety and hazard communications
- * Ability to create formal written programs and policies for regulatory compliance, training and recordkeeping
- * Strong analytical and quantitative skills, including the ability to use hard data and metrics to back up assumptions and drive effectiveness
- * Excellent communication and interpersonal skills
- * Strong leadership skills, and ability to energize and motivate teams
- * Excellent organization skills and effective project management
- * Strong PC skills including MS Office Suite
- * Ability to walk, stand, stoop, kneel, crouch, crawl, use hands to finger, handle, or feel objects, tools, or controls, reach with hands and arms, climb or balance, and lift or move up to 35lbs
- * Willingness to travel as needed domestically (up to 10%)
- * Fluency in Spanish is a plus!
- * Positive attitude, good judgment and strong sense of responsibility

**Environmental Health and Safety Director, Hartford CT Area
Acre**

Acre are delighted to be partnered with one of the world's most innovative and dynamic commercial real estate businesses to recruit an Environmental Health and Safety Director. Our client operates in multiple countries worldwide, employing thousands across the real estate and property sectors.

This leadership role will provide both project and corporate health and safety support, working closely alongside the VP to develop and implement environmental

management and safety programs for the business; fostering a unified and proactive EHS culture and providing a high level of assurance across a range of projects.

Key accountabilities for this role include:

- Supporting the VP in the development and implementation of the company EHS strategy
- Advising, guiding and coaching personnel with the implementation of the company EHS Policy and Management Systems
- Acting as a face of environmental, health and safety advice within the company and across allocated projects; providing advice and assistance to the C-suite members, project teams and managers on EHS matters
- Leading the development and implementation of company-wide initiatives and campaigns
- Managing and mentoring an ambitious and growing team of EHS professionals

The right individual for this position will have extensive experience across the property, real estate, retail or manufacturing sectors. You will have proven experience in change management and provide examples of influencing strategic direction within businesses whilst maintaining a positive relationship with stakeholders throughout all levels, from operations to C-suite executives.

Key requirements and skill sets needed for this position include:

- Bachelor's Degree in Safety, Environmental Science, Industrial Hygiene, Engineering or Related Field
- Master's degree is preferred but not essential
- Success hiring, mentoring and managing complex teams (global experience is preferred)
- Experience with OHSAS 18001 or ISO 14001 management systems implementation
- Direct experience working with local and federal EPA officials
- Experience within a multi-function/multi-unit environment
- Comfortable speaking at conferences, engaging and charismatic

Maintenance and EH&S Manager, Manchester, CT
The Timken Company Company

Your Career Begins at Timken

If you're ready for a challenging career that provides you with the ability to advance personally and professionally, look to Timken. Our associates make the world more productive by improving the efficiency and reliability of the machinery that keeps industry in motion.

Purpose

This position managers all aspects of the physical plant (equipment, infrastructure, building) and EH&S including responsibility for establishing strategic direction and leadership for the development, implementing and on-going management of industry leading environmental, health and safety programs in the Manchester facility. The Manchester facility has two manufacturing buildings, a fitness center and a conference center with grounds, parking lots and storage areas to maintain. The incumbent will provide leadership and direction to the maintenance group and skilled trades (i.e. motivating, developing, managing, evaluating, etc.), optimizing day-to-day operations of the department, ensuring compliance with safety standards, predictive and preventative maintenance programs, equipment repairs and upgrades.

Responsibilities

- Directly manage the maintenance group including talent management (performance evaluations, counseling/coaching, etc.) and the priorities of the team's daily work
- Manage safety and environmental programs, standards and procedures that will ensure the plant and all associates are in compliance with local, state and federal rules and regulations, including OSHA and EPA standards.
- Manage the facilities and all equipment maintenance and repairs including but not limited to:
 - Evaluate and analyze maintenance demand, implement changes as required, consistently attain weekly maintenance schedules.
 - Implement planned maintenance activities for facilities and plant-wide systems.
 - Implement the incident reporting and resolution process and followed up on all incidents.
 - Lead, develop, implement, and maintain predictive and preventive maintenance activities.

- Maintain an awareness of quality standards and leveraged resources to solve quality problems.
- Manage and schedule all maintenance and support activities provided by third parties.
- Manage the capital equipment installation and facility layout.
- Responsible for up keep of the production support and facility.
- Implement Lean Business Plan Development for the team. Reduce waste by identifying and improving value added and eliminating non-value added tasks in the maintenance, safety and environmental elements.
- Manage the plant safety team, and establish or maintain appropriate safety team roles and responsibilities.
- Analyze and report out key metrics as they relate to EH&S and maintenance arena to plant leadership and other parties as needed (this includes report out at the daily operations meeting).
- Develop strategies to eliminate gaps identified by audits, assessments or reports from others. Implement the corrective actions to address the gaps.
- Communicate between shifts and departments to resolve problems and sustain consistent performance toward objectives
- Ensure associate records are maintained in a timely and accurate manner.(Safety, Ergonomics, Training, Pay Records, Attendance, Overtime, and Vacation).
- Maintain Department budget within guidelines and meet cost objectives.
- Understand, comply and consistently administer Timken local and corporate policies; Ensure associates attended training as required.

Requirements

- US Citizen or permanent resident
- Bachelors Degree in Engineering or Technical field
- Knowledge of OSHA/EPA regulations
- Prior management/supervision experience
- Maintenance experience related to hydraulics, pneumatics, mechanical system, NC/CNC, PLC controllers and electrical
- Planning/coordinating skills to minimize equipment downtime and production needs.
- General machining skills and knowledge for repair component design and understanding
- Prior experience with managing material business plans and goals
- Preventative Maintenance and TPM or lean manufacturing knowledge
- Proficient knowledge of planned maintenance tools, including computer skills, data evaluations and presentation skills.
- Vendor management and contract negotiation skills

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, protected veteran status, or disability status.
