**Corporate Health & Safety Manager, Manchester, CT
Fuss & O'Neill**

Job Description: At Fuss & O'Neill, our mission is to provide our clients with innovative and practical engineering, scientific, and planning solutions to meet their needs. We act together as one company, collaborating to achieve our priorities; we believe diverse viewpoints make for a stronger team; and we support our employees' professional growth through training and opportunities for increased responsibility. We are currently seeking a Corporate Health & Safety Manager to join our team in Manchester, CT.

Position Overview: As the Corporate Health & Safety Manager at Fuss and O'Neill Inc., you will develop, implement, and administer industry-leading employee health and safety programs with the goal of keeping our most valuable resources – our employees – safer in their jobs. If you have the skills listed below, paired with the position requirements that follow, we want to hear from you:

Collaborative–Excellent interpersonal skills; highly collaborative yet able to function independently; ability to gain respect and ensure task completion in a deadline driven environment;

Education & Facilitation–Ability to communicate technical information to non-technical people; ability to teach employees why something is done rather than just telling them what to do;

Proactive–Creates a welcoming environment that encourages regular interactions with internal colleagues as well as with clients and other external contacts;

Leadership–Ability to coach and mentor others in a fast paced environment while completing work in a timely manner; willing to be a change agent; honest and positive;

Dedication–Committed to achieving success and driven to make a difference; ability to go above and beyond in order to provide exceptional customer service.

Position Requirements: Typically requires 5-10 years of experience with employee health and safety program development and implementation. Experience in the environmental consulting or similar field preferred. Bachelor's degree in Health & Safety, or a related field. Advanced oral and written communication skills required. Ability to interpret state and federal regulations and their applicability to our business strongly preferred. This position will reside in our Manchester, CT office. Visa sponsorship is NOT available for this position. TO APPLY, Visit our website www.fando.com/careers/current_openings to upload your resume and apply online. Fuss & O'Neill, Inc. is proud to be an Affirmative Action/Equal Opportunity Employer. All offers are contingent upon a successful criminal background check. Fuss & O'Neill participates in the Federal e-Verify program.

Advance Auto Parts

We are an Equal Opportunity Employer and do not discriminate against any employee or applicant for employment because of race, color, sex, age national origin, religion, sexual orientation, gender identity, status as a veteran and basis of disability or any other federal, state or local protected class

****This role can be based in Kutztown,PA or Enfield, CT****

Summary

The EHS Manager conducts execution of proactive safety programs for Advance Auto Parts operations in distribution centers based in North America which conform to Company proactive safety philosophies, goals, & ensures regulatory compliance (US & Canadian federal, state, provinces); designs and leads the implementation of safety strategies which engage all associates to prevent, reduce, and/or avoid losses that impact Team Members, drivers, customers, third parties, and business continuity. This position will also deploy and manage environmental programs. This position will report to the Director of EHS and works closely with Sr. EHS Manager Supply Chain. Partners closely with the Director of Supply Chain and works directly with distribution center leadership. This position will act as the Environmental, Health, and Safety subject matter expert for 2-5 distribution centers. This position will work directly with Operations Directors and GM to deploy safety and environmental programs. This position will not have direct reports and requires strong influence and coaching skills.

ESSENTIAL DUTIES AND RESPONSIBILITIES include the following. Other duties may be assigned.

Develop site specific loss control strategies to prevent and reduce hazards and losses for all business units.

Identify common safety/health hazards and establish guidelines for protection from those hazards.

Develop, implement, manage, and measure various internal safety programs/activities and compliance activities related to, but not including the OSHA, DOT, & other governmental safety regulations & programs.

Implement, manage, and measure various internal environmental programs and compliance activities related to EPA, DOT, DHS, and other governmental environmental regulations & programs.

Design, implement, and coordinate regulatory compliance activities, safety meetings, training programs, and any additional information or materials required for such.

Develop and manage internal partner relationships relating to safety and risk programs; for example: supply chain, legal, transportation, asset protection, risk management; other EHS Leaders.

Support Emergency Action Plans (EAP) and Business Continuity Plans (BCP) for locations. Participate in hurricane preparedness storm tracking and conference calls as needed (depending on geography of role).

Assist with property protection controls, including fire protection standards & controls, disaster and business continuity plans and training along with coordinating external fire & HPR (highly protected risks) inspections.

Communicate loss trends to each DC effectively so operators know what their key loss drivers are and provide the tools and resources to assist business units prevent and reduce losses.

Develop and maintain effective safety communications strategies.

Help maintain current HAZCOM program and provide store management with this information for dissemination. Keep managers and associates alerted as to the hazards of working with toxic fumes, dangerous chemicals, and any other hazardous substances.

Partner with other members of the EHS Leadership Team on cross functional projects that relate to Team Member, Operational, and Customer safety and regulatory compliance.

Partner with AAP's Risk and Claims staff to address specific along with current and long term claims trends in order to reduce the frequency and severity of identified hazards.

Audit safety/health programs for compliance with company standards, government regulations, and adequacy. Work closely with internal staff and third-party providers during this process.

Review and analyze accident reports and trends to ensure proper action is initiated to prevent the re-occurrence.

Actively support, coordinate, and enhance the LIFE program(s).

Implement safety related initiatives for Team Members and management as required.

Develop and manage the safety programs and action plans for the integration of future acquisitions and existing AAP companies.

Qualifications

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

An extensive knowledge of federal, state, province, and OSHA regulations and procedures on a multi-state basis. Knowledge of loss control strategies related worker's compensation regulations, general liability, auto, property, crime and third party administrators and their operations is essential.

Documented history of managing a multi-state safety program that achieved measurable results. Retail, fleet, and distribution experience is highly preferred.

Excellent communication skills required, in order to appropriately communicate with individuals of differing knowledge levels (e.g., store associates, management, doctors, attorneys, etc.) Ability to multi task, prioritize and organize work to meet deadlines and multiple requests desired.

Strong analytical skills needed to analyze and interpret data trends.

Managerial Or Supervisory Experience Along With Strong Organizational Skills.

Knowledge of overall store, fleet and distribution operations, to include policies and procedures, use and availability of manuals and guides, employee position descriptions, training and development programs.

Strong Microsoft Office skills.

Ability to present to, and train both small and large groups.

EDUCATION And/or EXPERIENCE

College degree in Safety or Occupational Health, other safety related programs; (post-graduate education) preferred; and Minimum of three to five years of related professional experience required;

Demonstration Of Prior Supervisory / Leadership Experience Is Required.

Prior distribution center or manufacturing experience is strongly preferred.

Experience with OSHA VPP is a plus.

We are an Equal Opportunity Employer and do not discriminate against any employee or applicant for employment because of race, color, sex, age national origin, religion, sexual orientation, gender identity, status as a veteran and basis of disability or any other federal, state or local protected class.
