**Environmental Health and Safety Specialist, Middletown CT
Arcadis**

Arcadis is seeking an Environmental Health & Safety Specialist to join our Environmental Permitting and Compliance team in Middletown, CT.

The Environmental Health & Safety Specialist will support the team/practice by performing a variety of tasks, including:

- Preparing Health & Safety Plans;
- Preparing and presenting health & safety training;
- Executing compliance tasks, related to facility operations and client requests;
- Facilitating regulatory submittals;
- Conducting regulatory research;
- Assisting with facility reviews, audits, and surveys;
- Performing data analysis; and
- Conducting site visits (e.g., for data collection, inspections/audits).

The successful candidate will have excellent verbal and written communication skills, proficient computer skills, good people skills, be well organized, professional, and able to accommodate a flexible schedule. Travel is required (estimated at 10%).

Candidates should have the following skills/experience:

- An understanding of regulatory framework
- Strong written and verbal communication skills
- Proficiency in Microsoft Office (e.g., Word, Excel, Outlook, PowerPoint) and Adobe Acrobat
- Strong time management and organizational skills
- Ability to work a flexible schedule
- Ability to work independently or with a team
- Problem solving skills

Required Qualifications

- Bachelors degree in Science, Engineering, Health & Safety or a related discipline
- 2+ years of experience

Required Driving Statement: This position requires a current valid driver's license and clean driving record.

Preferred Qualifications

- Certified Industrial Hygienist (CIH)
- Certified Safety Professional (CSP)

- Licensed Environmental Professional (LEP)
- Certified Hazardous Materials Manager (CHMM)

Why Choose Arcadis

Arcadis is the leading global design and consulting firm for natural and built assets, and we invite you to join us in partnering with our clients to deliver truly exceptional and sustainable outcomes. Contribute to the world’s most high-profile and transformative projects, from shopping centers in Shanghai and improved traffic flow in Atlanta to state-of-the-art rail systems in Doha, coastal defenses for Manhattan and cleaner air in Los Angeles.

Work alongside the industry’s foremost thought leaders and accomplished professionals, generating effective, real-world results. We are Arcadis: 27,000 people in more than 70 countries, creating value by applying our collective wisdom to every challenge. Our culture is collaborative, we believe in diversity and the power of global teamwork, and we own the responsibility to sustain the Earth and its people in a safe and balanced way.

About This Business Line

Now more than ever, businesses and governments recognize the need to incorporate environmental concerns into their decision making. As the leader in global environmental services, Arcadis has provided groundbreaking sustainable solutions for some of the world’s most complex projects. We wrote the book on environmental remediation, and our experts continue to pioneer the development and application of cutting-edge approaches in environmental planning, site evaluation, environmental construction and strategic environmental consulting. We are encouraged to innovate, apply emerging technologies and develop better solutions through global learning opportunities and workshops. Our team improves quality of life for our clients and their communities. Join us today!

EHS and Quality Manager, Windsor, CT
Eaton

Eaton’s Electrical Product Group is seeking an EHS & Quality Manager for its Crouse-Hinds Division. This position will be located at its Windsor, CT facility.

EPG Division has an opening for an Environmental, Health & Safety (EHS) Manager, responsible for the Crouse-Hinds Windsor Plant. This position provides EHS & Quality leadership to the Windsor site.

Making what matters work at Eaton takes the passion of every employee around the world. We create an environment where creativity, invention and discovery become reality, each and every day. It's where bold, bright professionals like you can reach your full potential—and where you can help us reach ours.

- You will manage EHS activities within plant.
- You will be responsible for establishing EHS objectives and targets.
- You will do Internal Reporting of EHS performance; specifically with MESH prism.
- You will communicate federal, state, and local regulatory requirements including updates from ENHESA and Eaton.
- You will support the development and deployment of EHS management systems.
- You will manage and maintain permits and letters of agreement with regulatory agencies.
- You will implement and manage plans including SPCC, SWPPP, Emergency Response, and others as applicable.
- You will monitor and analyze EHS metrics and establish action plans to close gaps.
- You will assure closure of MESH and regulatory findings on a timely basis.
- You will manage interfaces with the public authorities regarding Environmental, Health, Safety and Security.
- You will conduct regulatory training in EHS topics.
- You will be proficient in/certified in Hazardous waste (RCRA) and transportation of chemicals (DOT).
- You will conduct Security assessments and maintain the Security program.
- You will create a strong EHS culture that engages employees throughout the sites in EHS teams and processes.
- You will inspect incidents (including near misses, releases and losses) and accidents to direct preventive and corrective action plans.
- You will monitor and analyze Quality metrics and establish action plans to close gaps.
- You will be responsible for coordinating and supervising the Quality engineers, technicians, and personnel.
- You will manage the improvement and prepare reports with all the quality performance indicators of the operation: Customer DPPM, Internal PPM, Supplier PPM, Validation and Test Audit data, Internal Quality Alerts, Non-conforming material quality Communication, external component quality alerts, and A3s, 4ups as needed.
- You will support Plant Operation Excellence:
 - Plant Operating reviews and supplemental Management review meetings.
 - Division Operational Reviews Support.
 - Productions and Leadership Team meetings preparation and Support.

- Process Audits execution and improvements.
 - Quality System Internal Audits
- You will be responsible for establishing, developing and executing cost saving projects –mainly CONC reduction- and quality projects and improvements at the manufacturing lines.
- You will be responsible for controlling implementation in manufacturing processes, driving pFMEA analysis and RPN reductions, Measurement System Analysis, Process Capabilities and overall CAPA effective implementation
- You will own Customer Complaints and RMA process for external defects.
- You will own process for non-conforming parts and be responsible for making sure that the preliminary analysis are properly completed by the shop floor & quality team.
- You will support New Product development validation in Operations as well as support any plant –to-plant or Business-to-Business, product line transition using ProLaunch program.
- You will ensure Tailored Development programs are being accomplished by all Quality Personnel.
- You will attain plant Quality Goals, maintain and drive a culture of continuous improvement. Assure plans are implemented and attain results. Deploy the applicable elements and initiatives of EBS tools (EQS) to accomplish.

Eaton has announced its intent to spinoff its Lighting Business into publicly traded company (“SpinCo”). This transaction is expected to be completed by the end of 2019 and this position is expected to remain with SpinCo. The compensation and benefits that will initially be offered for this position are based on Eaton’s plans, programs and practices. The Lighting Business is in the process of developing its total rewards philosophy, strategy and structure, including the design of its benefits and annual and long-term incentive plans that will take effect when SpinCo becomes a publicly traded company. If you are offered and accept this position and are actively employed by the Lighting Business when SpinCo becomes an independent, publicly traded company, you will be eligible to participate in SpinCo’s compensation, health, welfare, and retirement benefit plans and programs and should have no expectations that SpinCo’s plans and programs will mirror or be substantially similar to Eaton’s.

When we embrace the different ideas, perspectives and backgrounds that make each of us unique, we — as individuals and as a company — are stronger.

We are committed to ensuring equal employment opportunities for all job applicants and employees. Employment decisions are based upon job-related reasons regardless of an applicant's race, color, religion, sex, sexual orientation, gender identity, age, national origin, disability, marital status, genetic information, protected veteran status, or any other status protected by law.

Qualifications

Basic Qualifications:

- Bachelor's degree from an accredited institution.
- Minimum 5 years of experience in a manufacturing environment.
- Minimum 2 years of experience in a management position.
- Lean 6-sigma green or black belt certification.
- This position requires the use of information or access to technology which is subject to the International Traffic in Arms Regulations (ITAR) and/or Export Administration Regulations (EAR). All applicants must be U.S. persons within the meaning of ITAR/EAR. ITAR/EAR defines a U.S. person as a U.S. Citizen, U.S. Permanent Resident (i.e. 'Green Card Holder'), Political Asylee, or Refugee.

Preferred Qualifications

- Bachelor's degree in engineering, occupational safety, industrial hygiene, environmental discipline or equivalent required from an accredited institution.
- Lean 6-sigma green or black belt certification.
- Professional Safety Certification or equivalent.
- EOQ certified Manager and Auditor for EHS and Process Management recommended
- 3+ years' experience in Environmental Management Systems
- Deep knowledge in various standards for management systems (ISO 9001 /ISO 14001 / ISO 50001 / ISO 45001 / ISO 22301) and understanding of national laws to drive legal compliance
- Working knowledge of quality and EHS tools e.g. statistic methods, problem solving, continuous improvement, occupational health & safety, industrial hygiene
- Experienced in contact with public authorities
- Experienced in leading functional and cross-functional team

We make what matters work. Everywhere you look—from the technology and machinery that surrounds us, to the critical services and infrastructure that we depend on every day—you'll find one thing in common. It all relies on power. That's why Eaton is dedicated to improving people's lives and the environment with power management technologies that are more reliable, efficient, safe and sustainable. Because this is what matters. We are confident we can deliver on this promise because of the attributes that our employees embody. We're ethical, passionate, accountable, efficient, transparent and we're committed to learning. These values enable us to tackle some of the toughest challenges on the planet, never losing sight of what matters.

Is remote work (i.e. working from home or another Eaton facility) allowed for this position?: No

Does this position offer relocation?: Relocation from within hiring country only

Travel: Yes, 10 % of the Time

Regional ABDA Safety Manager, Windsor, CT
Wayfair

We are Wayfair; we deliver a best-in-class customer experience in the furniture and home space, and we've been busy building a best-in-class logistics network that allows us to delight customers by speeding up deliveries, adding services, and reducing damage using our own physical, asset-based warehouses. The Logistics Safety Team is responsible for driving our safety program initiatives across our entire distribution network. We are continuously evolving our culture through an inclusive approach to health and safety with the intent to reduce the probability and severity of work related injuries and illnesses, while ensuring compliance and adding value to the overall operation. This is a dynamic, hands-on, cross-functional team, and we are looking for strategic and passionate people to join us on this mission at Wayfair!

What You'll Do: The ABDA Safety Manager will be responsible for the implementation and adherence of all aspects of our Injury and Illness Prevention Plan (Occupational Safety/Health Program) for the ABDA sites in their region.

- Analyze accident information, identify trends and key problem areas, and communicate to site leadership.
- Anticipate, identify, and evaluate hazardous conditions and practices and respond and aid in all emergency situations.
- Participate in development and implementation of hazard control method and safety procedures.
- Conduct inspections of facilities, machinery, and safety equipment to identify and correct potential hazards, and to ensure regulatory compliance.
- Partner with Terminal Managers, Regional Managers, Engineering, and Safety Committee to develop action plans to reduce workplace injuries and incidents, and promote employee engagement in health and safety programs.
- Partner with Management, as well as Operations and HR, to ensure all new hires receive safety orientation, and manage annual training requirements for existing employees.
- Ensure compliance with state & federal law as it applies to site as described in 29 CFR.
- Partner with ABDA Management and Safety team to develop, implement, and maintain driver safety programs for contract and Wayfair drivers.
- Ensure all required safety records, such as the OSHA 300 logs are accurately maintained in accordance with the law.

- Identify innovative ways to grow and maintain a strong safety culture and revamp employee safety training programs as necessary.
- Partner with Regional Safety Manager and other site Safety Supervisors to leverage safety and environmental best practices into overall standards.
- Other related duties as assigned or required.

What You'll Need

- Demonstrated knowledge of legal and regulatory requirements that govern worker health and safety; physical assessment and ergonomic skills; case management skills.
- Knowledge of local, state and federal fire and safety regulations.
- Demonstrated ability facilitate training and work in a team environment and achieve results.
- Ability to handle multiple projects, set priorities, strong organizational and time management skills.
- Work hours will be flexible to support multiple buildings with multiple shifts with dynamic changing business needs.
- Strong analytical skills; excellent verbal and written communication skills; proven ability to work and communicate with all levels of the organization; experience in a multi-shift operation a plus.
- Bachelor's degree in Safety or related field, preferred.
- 4+ years of experience in Occupational Health and Safety or related field within a distribution or manufacturing environment, preferred

**Health, Safety, Security & Environment (HSSE) Advisor, US Northeast, Hartford, CT
Stantec**

Grow with the best. Join a smart, creative, and inspired team that works behind the scenes to support operational excellence. Our functional services teams (FSTs) provide services to 22,000 employees in over 400 locations worldwide. Bringing together individuals with diverse backgrounds, talents, and expertise, our FSTs are vital to making our Company stronger. Explore opportunities in Health, Safety, Security & Environment.

Your Opportunity

Stantec is seeking an individual to support and coordinate the implementation of Stantec’s Health, Safety, Security, and Environment (HSSE) program within the Northeast, USA Region and will be based out of one of our larger offices in the New York State region. Under the direction of the Geographic Health, Safety, Security and Environment Manager, the Regional Health, Safety, Security & Environment Advisor will coordinate the day-to-day operations of the HSSE program within the region.

Your Key Responsibilities

- Support operations and office staff to be compliant with Stantec’s HSSE systems including the HSSE program manual and safe work practices, as well as local legislation.
- Assist with project pre-job planning and hazard assessments.
- Conduct field assessments, planned job observations and worksite inspections with leadership (which may require overnight travel).
- Promote HSSE within the region with a goal of continuous improvement of HSSE culture.
- Coordinate and provide HSSE advice and direction to Office Safety and Environment Coordinators (OSECs) and operational/office staff.

- Work with the HSSE Manager to track and manage all incidents and leading indicators.
- Track incident reports, ensuring follow-up is completed and documented as required.
- Conduct investigations as required. Assist in the development of lessons learned in conjunction with incident investigations.
- Support the subcontractor management program, coordinating, and conducting contractor prequalification assessments as required.
- Assist with regional ISO 14001 (International Standards Organization) and OHSAS 18001 (Occupational Health and Safety Assessment Series) audits.
- Organize events to promote health and safety. This may include North American Occupational Safety and Health (NAOSH) week, Lunch and Learns, etc.

Your Capabilities and Credentials

- A Certified Safety Professional (CSP) designation or Certified Industrial Hygienist (CIH) required. (Candidates in the process of obtaining a CSP or CIH designation will be considered.)
- Knowledge of US Occupational Health and Safety legislation.
- Strong communication skills, both written and verbal, along with excellent interpersonal and organizational abilities, coupled with an ability to work in a team atmosphere.
- Strong leadership skills and the capability to assess priorities and work independently.
- Computer proficiency with the Microsoft Office suite of software.

Education And Experience

- A degree in Occupational Health and Safety or a related field.
- Minimum of 5 years of relevant field work experience in an HSSE role.

This description is not a comprehensive listing of activities, duties or responsibilities that may be required of the employee and other duties, responsibilities and activities may be assigned or may be changed at any time with or without notice.

Stantec is a place where the best and brightest come to build on each other's' talents, do exciting work, and make an impact on the world around us. Join us and redefine your personal best.

Travel: Yes, 25 % of the Time
