Physical Safety Specialist (92819BR), New Haven, CT
Yale University Medical School Campus

Position Focus

The Physical Safety Specialist for the Office of Environmental Health and Safety is responsible for assisting in the development, implementation, management, and evaluation of policies and programs to control the risks and liabilities associated with physical hazards, equipment, and mechanical systems throughout the University.

Physical Safety Program Support: Provide safety expertise, leadership, and direction in campus risk assessment, hazard mitigation, and compliance with applicable regulations and safe work practices. 2. Audits, Surveys, and Inspections: Conduct comprehensive audits, surveys, and inspections of facilities to identify and address unsafe conditions or practices. 3. Mentorship: Mentor EHS Safety Advisors and other stakeholders on physical safety issues, fostering professional growth and safety awareness. 4. Training and Education: Develop and deliver safety training programs for staff, students, and faculty in both formal and informal settings. 5. Program Compliance and Management: Support compliance with physical safety programs, including but not limited to Confined Space Entry, Lockout/Tagout (LOTO), Electrical Safety, Fall Protection, Ladder Safety, Crane Safety, Power Industrial Vehicles, Mobile Elevated Work Platforms, etc. Review existing programs, assess sites and equipment, update written protocols, and provide tailored training. 6. Technical Guidance: Offer technical expertise on physical safety to university administrators, supervisors, faculty, students, and staff. 7. Design and Renovation Safety: Review designs for facility renovations, new constructions, and equipment placements, identifying potential hazards and suggesting safer alternatives. 8. Student Project Safety: Assess student project and activity proposals to identify risks and recommend safe or safer alternatives. 9. Safety Committees: Attend and support the Joint Health and Safety Committee and Shop Safety Committee when necessary. 10. Incident Management: Participate in incident investigations, conduct root cause analyses, and support corrective action planning and implementation. 11. Regulatory Monitoring: Stay updated on regulatory developments, advisory guidelines, and industry best practices. Advise EHS staff and relevant departments on changes and their implications. 12. Emergency Response: Serve as a member of the EHS Emergency Response Team, providing 24/7/365 support for hazardous materials incidents. Carry the emergency response phone as scheduled. 13. Other Duties: Perform other duties as assigned to support departmental and university goals.

Essential Duties

Supports the Physical Safety Officer in providing safety expertise, leadership, and direction in campus risk assessment, mitigation, and compliance with applicable regulations and safe work practices. 2. Serves as the primary internal resource for a comprehensive tool, equipment, and shop safety program. Conducts and documents job hazard analyses for fixed and portable tools, equipment, mechanical systems, and materials handling devices in shops, utility plants, building services and maintenance areas, laboratories, and other locations throughout campus.3. Coordinates and actively participates in the Shop Safety Committee.4. Works with shop end users and supervisors to develop and implement relevant hazard controls and safeguarding strategies for identified hazards. Defines competencies and safety SOPs.5. Serves as the primary internal resource for the Ergonomics and Powered Industrial Truck (PIT) programs.6. Mentors EHS Safety Advisors and others in the areas of tool safety, mechanical systems and equipment, ergonomics, and other physical safety issues.7. Assists in maintaining compliance with current physical safety programs, including but not limited to Confined Space Entry, Lock Out/Tag Out, Electrical Safety, Fall Protection, Ladder Safety, and Crane Safety. Reviews programs, assesses sites and equipment, develops and provides training, and updates written programs. 8. Reviews plans for new or modified facilities, equipment and processes that may have associated physical hazards.9. Provides technical guidance on all aspects of physical safety to University administrators, supervisors, faculty members, students, and staff.10. Participates in the review of student projects and activity proposals to identify potential safety hazards. Identify safe/safer alternatives and options where possible.11. Participates in incident investigations, root factor analyses, and the documentation and execution of corrective actions.12. Serves as a member of the 24/7/365 EHS Emergency Response Team for responses to hazardous materials incidents. Emergency responders are required to carry the after-hours emergency response cell phone as scheduled.13. Performs other related safety duties as required.

Required Education And Experience

Bachelor's degree in Environmental Science, Industrial Hygiene, Radiation Safety/Health Physics, Biology, Physics, Chemistry, Engineering, or related field and four years of work experience in a safety-related field or an equivalent combination of experience and education.

Required Skill/Ability 1

Ability to work and thrive in a dynamic and diverse environment. Superior oral and written communication skills to maintain effective and cooperative relationships with students, faculty, staff (union and non-union), co-workers, public, and regulatory agencies.

Required Skill/Ability 2

Ability to prepare and present technical training to a wide variety of audiences, including students, staff, contractors, and faculty.

Required Skill/Ability 3

Proficient in preparing technical reports, documents and procedures. Well-developed time management, planning, and leadership skills.

Required Skill/Ability 4

Demonstrated skills and knowledge in technical safety engineering, including applicable observation and monitoring, mathematical calculations, and other assessment techniques.

Required Skill/Ability 5

Experience in supporting, leading, and/or facilitating EHS committees.

Required Licenses Or Certifications

Professional Certification: 24 Hour OSHA HAZWOPER certification (required after hire); First Aid/CPR certification, and valid driver's license.

Physical Requirements

Ability to stand, walk, lift, push, pull, twist, and negotiate awkward paths of travel. Ability to periodically perform short duration physical exertions, including light-medium weight lifting, pushing, pulling, stair or ladder climbing, etc., in support of a safety investigation, area or operations survey, or emergency response. Ability to wear and use personal protective equipment for hazardous materials handling and spill clean-up including respirators, safety shoes, goggles, gloves, and fully encapsulating protective suit, up to and including self-contained breathing apparatus (SCBA). Ability to work in a variety of physical environments including weather extremes, potential confined spaces, elevated locations, etc. In support of emergency response work or assisting other EHS units, ability to lift up to 50 lbs. and move up to 500 lbs. of waste or other material using rolling carts or drum carts.

Preferred Licenses Or Certifications

Certified Safety Professional certification (CSP) highly preferred. Certified Electrical Safety Compliance Professional (CESCP) or equivalent experience. Construction Health and Safety Technician (CHST) or equivalent experience.
